

# Sr KG students' appeal adults to save nature

**W**e have learnt in our Little Angels Eco-school, Panvel, about different types of pollu-

tion and how our actions are harming plants and animals. We have been thinking about ways to stop further destruc-

tion of environment. We should celebrate all festivals in an eco-friendly manner.

Here are some of the steps we have come up with, with the help of our teachers:

Let us use bio-degradable decorative items instead of thermocol.

Let us avoid loud music and follow the deadline for loud-speaker.

Let us use idols made of clay instead of PoP.

Let us use 'nirmalya' and avoid throwing flowers in water.

Let us use cloth, jute or paper

bags for shopping to reduce the use of plastic bags.

Let us avoid fire-crackers.

Let us avoid cutting trees. Burn a small bonfire made up of dry leaves and dry flowers for holi.

Let us use eco-friendly colours during holi. Avoid harmful chemical colours.

Let us follow traffic rules.

Our actions should not lead to traffic jams. Also honking should be avoided as it adds to noise pollution.
